

Mission

RevAULusion's mission is to revolutionize the way autism is perceived and success is achieved!

Vision

- Our vision is to build an Autistic Community Campus, an all-inclusive 'neighborhood', where individuals on the autism spectrum and other special needs (along with their families) will find medical, educational and residential programs and services.
- Where businesses, organizations and individuals will find guidance, training and events to expand their knowledge.
- Where knowledge becomes understanding, understanding becomes acceptance, acceptance becomes action and that action becomes inclusion.
- Inclusion into the community, inclusion into businesses, inclusion where those on the autism spectrum and other special needs are trained and educated, utilizing their gifts and abilities to enhance their lives and the lives of those they touch. Where neuro-diversity is as "normal" as waking up every day. Where differently-abled individuals are encouraged to teach us as much, if not more, than we teach them.

Focus

- Encouraging the community to learn how and why unique autistic individuals give us the capacity to grow and learn new ways of experiencing the world around us.
- To protect and give voice & rights to our special needs children and adults.
- To give the autistic learner the assurance that their views and way of seeing things is valid and beautiful
- To provide education & support to people on the autism spectrum
- to educate children how to learn (at their current level), and to teach them to love learning so they continue on that path for the rest of their lives
- to ensure our focus remains on contributing to the education and well-being of the students well into their adult years
